-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2131067.

GB '067 teaches an oil-based drilling fluid which comprises a hydrocarbon, a latex and an emulsifier within the scope of the present invention (see the examples and page 1, line 57 – page 2, line 4). Applicants intended use in sand formations does not distinguish over the prior art (In re Pearson 181 USPQ 641).

3. Claims 1, 4, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Patel (4740319).

Patel teaches an oil-based drilling fluid which comprises a hydrocarbon, a latex and an emulsifier within the scope of the present invention (column 6, lines 1-53). The examples teach up to 5 ppb of latex material, which would be at least within the scope of greater than about 0.1% of claims 5 and 7. Applicants intended use in sand formations does not distinguish over the prior art (In re Pearson 181 USPQ 641).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2131067 or Patel (4740319).

GB '067 and Patel are described above. GB '067 and Patel differ from the present invention in that the specific size of the latex particles are not disclosed. The latex in both references is used in fluid loss control. It would be obvious to one of ordinary skill in the art to vary the size of the latex particles of Patel or GB '067, in order to optimize the fluid loss control of such particles, in various formations encountered when drilling.

6. Claims 8-14 are allowable over the art of record.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach the present use of the latex containing oil-based fluid in a sand formation.
